do you have proof i went on a mod's account or not - didn't think so .. lmao it's the internet seriously. you let w3st0ne back after he evaded and cheated in the server 100+ times but you won't let me back because i make you cry baby tears with my hurtful words. brb banning me from the entire server for years because i said i was mad at a girl for posting all my personal information in IRC .. makes sense in moron logic.
