Sorry about that, My CD's are ruined apparently. Wasn't going to post anything until I noticed Omar is running windows 8.1, which may come with some issues that could be compatibility related.

I have windows 7 64 bit, would ya'll like me to test anyway? In the case of the compatibility issue(s) with windows 8/8.1 that may exist? It will not be a CD install, but the CD Key is still valid.
