KobraOps was just speculation tbh. We never technically caught him even though a lot of us thought he had velocity. During the time he played, I was running the main clanwars servers and I had a shit load of anti cheat. Caught some pretty funny moments there like DrkXfactr, bigd442, Tildeth and the best one of all, SoQAshy lol. RR also played a role so I was also able to detect \*cheat name removed\*users running RR. But KobraOps never came up at all. We probably didn't have velocity detection back then. I can't remember.
