---

MPF and RenCorner both have ping lag spike issues which tons of people are experiencing. While playing the ping randomly jumps to above 300+. I have a simple CMD script which loops pinging MPF's server (IP pasted from RenList) and in the CMD script I don't get the lag spikes.

Other people like ExEric are also experiencing this.

Not sure if this is Dragonade or the new scripts or what the matter is exactly.
