And in case it helps, here is a clone of Reveal\_Object(DamageableGameObj \*)

```
bool EncyclopediaMgrClass::Reveal_Object(DamageableGameObj *object)
{
    bool b = false;
    if (object)
    {
        if (cGameType::GameType == 1)
        {
            int type = object->Get_Definition().Get_Encyclopedia_Type();
            int id = object->Get_Definition().Get_Encyclopedia_ID();
            if (type != -1)
            {
                if (!Is_Object_Revealed((TYPE)type,id))
                {
                    Display_Event_UI();
                }
                b = Reveal_Object((TYPE)type,id);
            }
        }
    }
    return b;
}
```
