dubstar wrote on Tue, 14 November 2017 03:25~ How hard would it be to find all the bits required to build using the 4.x version?

~ other than dropping XP support, will there be any disadvantages if you use the scripts 5 branch? will it break anything client/server/bot related?

~ Are there any advantages using the scripts 5 branch?

Personally I think that scripts development should continue if people are willing and able to do so, If there is no problems other than dropping support for an old OS then using the new branch should be given the go ahead.

People are indirectly forced to upgrade from XP nowadays because there is no support for it anyway.

Your team have done wonders for Renegade, from bug fixes to anti-cheat and I hope that continues

I don't think Jonwil means an exact copy of the 5.0 branch, just dropping xp support and using the same build tools. If it were an exact copy, a lot of things would break in Renegade.
