Subject: Latest Dragonade
Posted by Unstoppable on Fri, 19 Jan 2024 15:22:33 GMT

I am maintaining a mirror of Dragonade at https://github.com/TheUnstoppable/Dragonade
Keeping it up-to-date with latest TT releases, adding features on request and fixing bugs when needed.
Check out the Releases panel to the right in the repository page to download the builds.

This mirror features the following remarkable changes since the original Dragonade 1.9 by Whitedragon:
 Private Chat Hook
 Veteran System
 Kill Streaks
 Building Annotations (75%, 50%, 25% and Repairing warnings)
 Various fixes to the existing Dragonade code.
 Smart bots (AKA. moonsense715's bots) integration in kill messages.
 Utilization of the recent TT features such as HUD weapon/information icons.

 Feel free to ask any questions or drop your suggestions below.
 You can visit my other projects at https://github.com/TheUnstoppable for useful plugins.
