Goztow wrote on Fri, 08 March 2024 00:26 If you have a problem with "rubber banding" or you cannot move when you join an online game with the steam version, then do this:

- join an online server
- hit F8, a command prompt will show up in the top left corner
- type: net\_update\_rate 30

this will set your net update rate to a value different from 0, which is a bug in the steam release. This luckily shouldn't be needed anymore after our last patch.
