This guy spams more than Sk8rIMuk. Look at his post count and then look at his posts.    All that to get to commander :rolleyes:

1 word posts in the Linux forums. It agrivates me to have posts bumped down by people like this posting on dead threads or threads they don't even read. Don't tell me you read every story on this page and posted only after you read.

EVERY single Linux post has his name in it. None of what he posted is even helpful.

Almost every post has a comment in it from him. Most of which are 1 or 2 word phrases and comments.

All I ask is for you to stop, slow down. What is the rush?
