Oh, fuck off!

Don't get me started with the kiddie shit again.

I simply found it amusing that they're trying to make a fancy website for a product that may never be released. DONT GET ME WRONG I hope that it is released ... and soon ... and I'd probably use it ... but acting on the moment I found it amusing and I was simply pointing that out.

Oddly enough, I don't think I addressed anyone except Crimson and her team. Let's keep it clean.
