What you will need: A Jar, a net, some sewing thread, and a freezer.

1: Take the net and the jar and go outside.

2: Use the net to catch either a dragon fly or a bee and put one into the jar.

3: Put the jar into your freezer with the insect.

4: Wait 3 mins or until it stops moving.

5: When it stops moving take it out and tie the string around the tale of the dragon fly or the abdomen of the bee.

6: then when it wakes up you have an insect on a string!!!

7: then fly it around and when you are done just cut the string short and the bee and or dragon fly is free.
