Ok, i have not been posting on these forums, as following two - 20 boards is a little difficult, and have been spending my time with programming, troubleshooting, etc...

now i get links to this board on a daily basis, i look them over, and go on, but today... i have see something disturbing, and a little likey to piss me off...

RenEvo links have become "spam" on this board...

well, my opinion of the person that said that, and there actions, have become drastically lower, i am just trying to help out the community, and am silently getting bashed for it... do i care, not really, just lose respect for some people thats all.

anywayz, yes i do read this forum, will i reply, doubtful, as i tend not to have time to answer flame wars, if you need technical help on BR .Net, there is a dedicated forum for it on RenEvo's Website, if you want info on the Dead6 Expansion Pack, also, a dedicated forum for it on RenEvo's Web Site, if you need to just ask me a question, or tell me to fuck off, there is also that on RenEvo's forum.

Never has there been a n00bstories vs. RenEvo... all of you that made that little tiff up in your head are morons and should be drug out by your testicles and ovaries and hung to die.

Another note....

Suggestions are welcome... flames are ignored... if you want RenEvo to evolve something for you, we will, if you want us to just STFU, we will talk louder.
