I just got the animatrix on DVD and it really fills in the holes. The Second Renaissance was a really disturbing movie but it was informative. Can any one tell me how Zion was created? If it was a huge tunneling project wouldnt the AI be able to follow the hole that leads to zion? In the final flight of osirus why did the AI need tunneling machines if they could just use the tunnels that the zion ships use. I was watching an anime long ago on cartoon net work that talked about a planet named zion that was the last planet controlled by humans and was defended by 5 goddesses.(they were mechs in space) Does the name zion have some kind of anime background?
