OrcaPilot26I'm almost done with the F-15. This won't be flyable

F-15 SMTD

The Maneuver Technology Demonstrator really isn't what you should be using. If you remember correctly, the only aircraft the GDI had in Tiberian Dawn were the Orca fighter, F/A-18 Hornet, and the A-10A Thunderbolt II.

Put A-10s on the tarmac, instead.

The MTD wouldn't even be in the Tiberian timeline because of the purpose it was created for - it's a technology demonstrator for the F-22's thrust vectoring engines. It would fit in with the Generals storyline.
