I already have a few A-10s. I'm going to keep the F-15s though, IF TD is really the sequel to RA1, who know's what aircraft there would be, if it isn't, maybe GDI would use modified F-15s because they can't get their hands on expensive F-22s (there was an F-22 in a TD cutscene). Of course there's always the F/A-18.
