OrcaPilot26I already have a few A-10s. I'm going to keep the F-15s though, IF TD is really the sequel to RA1, who know's what aircraft there would be, if it isn't, maybe GDI would use modified F-15s because they can't get their hands on expensive F-22s (there was an F-22 in a TD cutscene). Of course there's always the F/A-18.

There were no F-15 S\MTDs in RA\TD at ALL.

The A-10A and F/A-18 is the safest route, as you seem to be the most nitpicky person I've met pertaining to Renegade being canon.

Go for the gusto and put in UH-60A Blackhawk helicopters, which were also in TD.
