Yeah, that goes for your clanmates too I was playing C&C_City_Flying on my clans server a while back with the rest of my clan. One of the server admins, who is in the clan was playing Nod and it was near the end of the game and Nod had the Hand and the Ob left. I drove into the Nod Base in an APC and killed my clan mate (the serer admin) around 15 times by running them over with the APC and eventually he go pissed off and did a "gameover" on the server.
