Subject: password changes by itself

Good luck: EA support is an oxymoron. I just changed my nickname and my old one keeps
popping up and then it says I have an invalid password.
I fixed it by going to
HKEY_LOCAL_MACHINE\SOFTWARE\Westwood\Renegade\WOLSettings\Logins and deleting
the old account. You may want to try the same thing and then re-input your login and password.

BTW, Westwood's new user login signup NEVER sends an e-mail confirmation back to auth. it
and tech support, again, is useless and did not answer me why this is happening.
