npsmith82Umbral_DelaFlareYou know what else we need? Less ignorant n00bies like you who post pointless and stupid topics.

What we do need less of here are forum trolls who go around every topic posted by new guys and slaughtering them with sarcastic and irrelevant replies... just because they are practically the only threads being posted right now doesn't mean you (not specifically you umbral) have to post a spam reply.

Amazes me how many people around here flame a newbie who just came to the forum for some info and intelligent replies...

I beg to differ, npsmith....

gumgum904I thing there needs to be something coming out like a renegade 2 if there is i dont know about

This is not an intelligent post. If he had read some previous thread before he posted, he would have not asked a stupid question like he did.

Who are you calling a forum troll? Look at the number of posts I made. Comparing the other people in here to me, they already are two feet tall, big noses, and large pointy ears.

Now get me a soda, you incessantly annoying troll!
