Ok after alot of messing around, i have got the nod harvester working, yet the gdi one, comes out of the war factory and just stops..., i have put the scripts.dll into the folder scripts, and i have got the waypaths done as in the tutorial on http://www.renhelp.co.uk

but my gdi harvester doesnt move... can any1 think of anything i might of forgot or that tends to happen alot when doing the gdi harvester!

thankyou
