Sir PhoenixIt's an M-16... And an M-16 would surprisingly, believe it or not, look just like another M-16.

And there is an extremely insufficient amount of evidence in any of those screen shots to link laubi's model to any of them.

(and niether of the links to laubi's models show any red tape on the magazine at all...)

zoom in on the second one. Mostly on the 3rd person models.
