---

The cheaters that are out there are realtively stupid, they don't even know how the cheats are made, the fact that almost all of them are useing Final Renegade is proof of this.

Anyone who is 'smart' enough to crack RenGuard will not relase it, because once they do, RenGuard will up date, makeing all there hard work useless.

Now there is another type of person who will try to crack RenGuard, these are the people who wish to see it fail. These are the dangerous people...
