Yan I am using a GeForce2 mx400 it runs BF1942, UT2k, Halo, MOHAA just fine for me. Someone is offering me a GeForce4 mx440 for ~\$35. I have looked at some reviews and still cannot decide. Is it worth it? (I will not spend more than \$60 for a video card any time soon)

I have a G4 mx420, lol I thought that was old!!!

Mine works pretty good, but once you get to playing 50+ players on renny it gets a bit slow.
