Looks good, I liked the layout of the first.

May I suggest adding some more textures?

Maybe some craters?

Also, since this is later in the day, maybe change the water level? Tides and all...

And since you seem to be able to do all this animation stuff, maybe you could do something with the C130? instead of flying so high, maybe make it fly in at a funny angle, drop off the vehicle, then make a hard bank bearly makeing it out alive?
