What we are talking about here is data, a unneeded part of human civilization. Data has no real law, data is just a thing we use to entertain our selves. Its like trying to take money away from some one who is humming a tune. a tune is a thing that is not a physical object unless u thing of the little bits of energy. People shouldnt have the right to sell you feelings, its like selling fm radio. Fm radio is brodcasting every where and we take the data in our air and convert it into sound. p2p file sharing programs is like the air and p2p file sharers are the radio brodcast head quarters. People who are getting sued are the people with the radio. they think if they eliminate or control our radio they will stop this, but the better way to stop it is to take away the air which is imposible, there for all you have left is the broudcasters. We humans all have a magnetic field we produce around our bodys that we have no control over. Its like the riaa is tring to stop us from doing what we have no control over. The RIAA is nothing but a meaningless orginization who will never stop people from broadcasting.
