In my opinion go for the "PNY GeForce FX 5200 Ultra 128MB DDR AGP". I use them in my
the FX series.

It's a little better than the GeForce 4 ti 4200 and your's getting DirectX 9 support thrown in as well as 8x AGP. I don't know about there but here in the UK the PNY version comes with a good bundle of software + connectors.
