In my maps I have many bots and AI gun emplacements but I still want it to bring out as much joy as possible, and for that I need animations but I do not know how.

So in other words......I want tanks and soldiers moving about to different positions and maybe aircraft flying around and maybe make troops drop from choppers every so offen etc.

So does anyone know how to do this, please tell me or tell me were a good tutorial on making animations are please. Thx
