Triggerhappy I have an idea for a mod, that I can't make.

It's similar to a TS mod but farther into the future. and instead of AGT theres IDU (Ion cannon Defensive satellite Uplink). it would look like a half dome with an antennea coming out of the top, but to one side. Nod characters would be raveshaw (brought back to life), Mendoza (unfrozen from the temple of nod), black hand stays the same (except weapons, and are all mutants/cyborgs(cyborg is alt.), anhiator (instead of sakura), and technician

The acronymn would be "ICDSU".

And it's called "The Advanced Communication Center".
