fI00d3dHey, Warranto, just for arguments sake (lol) maybe he's seen atoms, viruses, and 'other people' on TV or under the microscope and thus believes in that? Plenty of proof those things exists. Just a weak argument that I HAD to jump on.

Ah, but I've seen God etc. on TV, and to bring it up, pictures as well. And if he's seen it under the microscope, you can only say that if you assume the microscope is working, and hasn't been tampered with. My point was, just because you haven't seen it, doesn't mean it's not there.

Well, enough of this "argueing", at least in this topic.
