Lets see I've only gotten one double headshot and it was against a Sakura and Black Hand sniper using Deadeye. And a few double kills with the ramjet.

One kill I aimed at and engineer from far away with a PIC and a Technician walked out at the last second and he got killed too.

Another time I was Havoc and I saw a sbh just right before he disappeared. About 10 seconds later I aimed where I thought he would be if he had kept walking in a strait line. I pulled the trigger and nothing. I fired again and hit him, and I saw him change direction. I'm sure he was thinking wtf, but he never said a word. Just when I thought I had lost him he started shooing at me...mistake.

But the shot that even tops them all was the time my FPS dropped to 2 (it said 2 but it was more like 1.5!). I was thinking oh piss he's gonna kill me, then I pull the trigger and boink. I didn't even see the frame where I aimed at him.
