How can you sleep through a bomb that powerful? Here in Medicine Hat (In Canada) our research base sometimes tests fuel airbombs without dropping them from planes. (Detonates on ground) They are over 40KM's away from my house, and I was reading an ARchie comic . I was leaning over my couch, and then all of a sudden, I hear a loud bang, and the fuckin ground is vibrating like crazy. I almost shit myself, I thought my furnace blew up. So I checked and it didn't and my neighbor phoned and asked what it was. So when my dad came home, he told me they were testing a bomb similar to the fuel air bomb, and the weather conditons carried the shockwave farther than anticipated. Anyway, HOW THE HELL CAN YOU SLEEP THROUGH A BOMB WAY STRONGER THAN A FUEL AIR BOMB!??

OH yea gtotal tell you this too. Last summer. I went to the base becasue there was a British Tank show. It was pretty cool, showed usa tank that let out a smoke screen . Anyway, the Brits were showing off their new tank design (ordered hundreds of them) and it broke down. It was hilarious
