---

pistol is to aircraft as stinger is to tank

stinger is to aircraft as tow is to tank

its like that

if a stinger hit a tank it would explode burning the outside but it doesnt have enough power to really do anything. Its like an RPG one rpg will not do anyhting. but many (maybe 10) fired in the same spot at the same time could do damage. Same with the stinger. But making the stinger an antitank weapon is just rediculous.

and whats a ww2 era tank doing with stingers???? Use what the manual says not the picture.

id beleive a tow hitting an aircraft more than a stinger, but the tow does over over 200 pounds and isnt hand held. So id saying give them a bazooka.
