a while tow system not the just the rocket ways over 200 pounds it takes mroe than one eprson to use and cannot be held and shot. It either needs to be mounted or on a tri pod or quad pod.

And a stinger will not damage a tank, no matter how much you say it will it wont. and even if it did one person cannot carry enough ammo for it to do that. Even in cnc. What are you gonna give the guy 50 missiles?

like i said if your gonna totally screw up real wepaons be creative and make your own. its not like you using the red alert wepaons any way.
