<http://www.quietpc.com/uk> Offer quiet cooling products. Dabs.com also sell the stuff made by quiet pc so I'd check the prices there too. Coolmaster, Thermaltake and Zalman offer silent cooling too, you need to buy them from an e-tailer.

Ones I have used are:

<http://www.dabs.com> (Main one I use)

<http://www.ebuyer.com> (Cheaper for specific components)

<http://www.komplett.co.uk>

<http://www.coolcasemods.com> (Good for modding stuff)

<http://www.over-clock.co.uk> (Good for modding stuff)

<http://www.tekheads.com>
