Hmmm... Are you shure thats it? If yes, then do me a favor:
To test its functions, change target and start in to a simple letter or number.
Next try to open it.
Then tell me what the error message of it is.

If it does work even if you changed it, then I am not sure...
You should change it back to the way it was after testing that.
I dont want you to lose its sources if this post is somehow deleted.
