---

I have a 1.6ghz AthlonXP (clocked at 1399)  
GeForce2 with latest drivers  
256meg of ram  
Broadband connection  
Direct X9.1 (i think)

i run renegade with all details on high, with a 640 x 480 (ish) resolution and i get a horrible frame rate and am usually the last to load up

for example i was on conquest islands and had a stable 30fps while the 'gameplay pending' message was up.

Anyone get any suggestions?
