Sir PhoenixxInfinintAircraftkillerEvery fucking thing you've done has been cancelled.
I've never released anything to be cancelled Mr. Observent

if I released something no one would download it.

That's exactly what cancelled means dumbass. Cancelling means stopping a project before releasing it. You are so fucking stupid. And you wonder why no one likes you.

You have the most flawed logic of anyone. No one will think that the stuff that you make is good because the stuff you make sucks. The best of your stuff wouldn't even qualify as below average. People don't download stuff not because you have not released anything before, they don't because they don't think it would be worth it to download something that's bad.

And how would you know the stuff I make sucks?

And here is the flaw in your topic, I havent released anything before so if i release something most people will just think its some n00bish map becuse they have never seen anything else by me, much like C&C Ultimate Plateo.

EDIT: This is going to turn into a flame war, I sugest it should be deleted.
