Whoa....

Crimson, calm down.....

I meant that if someone was caught and kicked from cheating in loads of servers, and still didn't understand not to cheat...it seems retarded to ban them from virtually all servers on GSA/WOL.

But i dont want to get into this any further...

Quote:

There is also a "transparent wall hack" which turns all the textures to alpha blend, which doesnt allow you to shoot through them, but does allow you to see through everything.

My gfx card does that...With multiple games too. On most Renegade maps (esp. C&C_Alpine) I can see right through the tunnels, walls, buildings...

It has happened with other GeForce cards before also.
