Adavanze

When renguard is released (if it is released) i will be checking if it is crack proof, and there is really no such thing as hacking an exe or dll, this guy is probably gonna resort to notepad to open the files for renguard .

Yeah, I can see it now: (n00b after opening Renguard.exe for "translation" with notepad)
"Hmm...looks like hex. If I wanna be a leet haxor then I'd better get to learning hex so I can translate this puppy into plain English scripting!"

If you didn't get it, then don't bother >_>...
