If i remember right, the Officer and Sydney+Mobius can see Stealths much better when they have those suits on, or are just Officer.

I don't know why, but i always see stealth soldiers, MUCH better when i have officer, when i have a normal grunt soldier, i have to squint my eyes, and look like a fool looking for the guy that planted the beacon.

If this is true, then he could have just been seeing them from long distance because of this.

but i might be VERY wrong.

Just what i remember and such...
