---

bigejoe14Reborn = pawned

pawned? Ohh well I can't get the thing to work at all I tried reinstalling it as well and it just won't work I downloaded noth of the installer things and made sure everything was installed to the correct directories but it just doesn't work it gives me a .dll error thing so I uninstalled it and don't plan on istalling it untill they actually have a version that will work.
