You should also train to use your pistol as a Stealth Black Hand. Because of the silencer, you can quick-kill weaker infantry, who are e.g. healing buildings. 5 quick bullets to the head. And they don't do that flop down thing when they're prone and get hit, because they're in an action of using their repair gun. You can get covert kills, and take cover before the enemy even sees where you killed him/her from.
