Sole Survivor was not an online version of TD. It's essentially a multiplayer, single-unit game using TD's infantry and vehicles. It bears some similarity to Renegade in that you can only control one unit. Crates allow you to upgrade your armour, firepower, health, speed, reload rate, stealth etc.

Unfortunately, keeping TD's control scheme didn't help it, nor did the fact that a fully upgraded unit could destroy you before it even appeared on your screen!

It was fun for a while, but ultimately died a deserving death.
