FUCK!!!!!!

Im telling you they better put it back on or ill personally go kick EA's fucking ass.

Edit: Ive just been informed that at the end of every month the servers have to reset their bandwidth , this process can take up to 2 days.

Mods/Maps can still be played thankfully to All Seeing Eye and Gamespy.

Download "All Seeing Eye" = http://www.udpsoft.com/eye2/index.html
Download "Gamespy" = http://www.gamespy.com

Thanks and i hoped this helps.
