Subject: New Remote Administration Capability for the LFDS
Posted by mac on Mon, 29 Dec 2003 10:37:13 GMT

New version, preparing it for the upcoming brenbot release.

Current Version: 0.2

Changelog:
 Fixed a few bugs while reading the config file.
 You're no longer needed to set your gamespy query and gameport.
 Connected telnet clients will get the output from the logfiles now, instead of the host console. This includes Team messages.

Download it from http://www.brenbot.com/wrapper/
