kopaka649TheGunrunWell, i found this glitch in canyon. If u were in a nod apc and some vehical pushed u up this little hill by the entrance to the nod base u are teleported to other side of map. Ask forsaken about this i showed him it once.
actually, you fall into blue hell AFAIK, done it with buggys a while back

No, i bet ur thinking of that little clif with the tib at the bottem and the tunnall snipers spots. what im thinking of is the one neer the entrance of nod base. And if ur a nod apc and a buddy pushes u up u will fly into the ends of the map and the guy in the buggy will auto die for some reson. REmeber im talking about the small hill not the large thing were people drive buggys up to cheat in sniper matchs.
