well you shouldnt really do it then because what if an apc full of people come? or what if they destroy base defenses and men rush in?? its dangerous (for lack of a better word) to leave tanks just sitting there un-used because of the threat of the other team. but thats just me speaking from experience cause when i was a noob a long time ago i did the same thing and ive never done it since even with defenses " gaurding " my base.

well gotta go.....snipe ya all later
