"Jelly"Dude no if you have a good graphics card u can see them across the field. Next time im on Field III take a screen.

i bet you meen that you can see your teem's stanks across the field and i'm almost 100% sure that no one with any viedo card can see a stelth tank (unless it's beeing shot at or explotions near it) more then 5 1/2 APC's lenth away (parked end to end long way) , unless they are cheating.
