Want to play as the dark skinned GDI soldier you see in the single player missions? Now you can. You'll need windows RAR to unzip this, and the minigun3 and 4 files are there to reverse the dark skinned ones into light ones in single player so that every GDI soldier won't appear dark skinned. The dark skinned soldier holds himself slightly different from the regular one, so it's a nice change. Any problems unzipping this file tell me.
