SuperFlyingEngiThe Philadelphia, if memory serves me correctly, is a really high-level military complex, and it probably couldn't hold the majority of the world. My solution: create a special breed of goats that eat Tiberium, and then clean out the planet in about 5 minutes.

That's ok, since the majority of the world's population was killed off by Tiberium, and alot of those that didn't die from Tibeirum poisoning were mutated, who wouldn't be allowed on the Philadelphia, also, there is a good number a people who are loyal to Nod and wouldn't be brought onto the Philadelphia. So this space station could hold most of if not all of everyone who is left.
